

# MAIN SYMPTOMS OF A CONCUSSION AFTER A VIRGINIA CAR ACCIDENT

People who have been involved in a car crash may suffer a bewildering range of injuries. A mild traumatic brain injury, also known as a concussion, is not always simple to diagnose. Symptoms may not be apparent at the time of the crash if you are in shock. However, there are some symptoms of a concussion after a Virginia car accident that you should look out for.

## MAIN SYMPTOMS:

- Loss of consciousness however brief;
- Ongoing headaches;
- Little or no recollection of the accident itself;
- Ringing in the ears;
- Nausea;
- Vomiting;
- Forgetfulness;
- Slurred speech;

## SECONDARY SIGNS:

- Irritability;
- Problems concentrating;
- Changes in personality;
- Sensitivity to light;
- Smell disorders;
- Taste disorders;
- Difficulty getting a good night's sleep.

**As soon as you experience these symptoms, you should see a doctor.**

If you delay treatment, the insurance company for the at-fault motorist will argue your condition is not serious. Aim to see a doctor within two days of a car crash in which you believe you suffered a head injury.

**At Cooper Hurley Injury Lawyers, we work with people who suffered head injuries in Hampton Roads traffic collisions and elsewhere in Virginia as well as northeastern North Carolina.**

You may also have suffered a concussion on the sports field or in a fall. Call us today for a free consultation at **(757) 241-8716**.
